# COMMUNICATIONS PLAN

## I-75 (State Road (SR) 93) PD&E Study

From east of SR 951 (Collier Boulevard) to SR 78 (Bayshore Road)

### Collier and Lee Counties

The purpose of this Communication Plan is to assist in providing information to and obtaining input from concerned citizens, agencies, private groups (residential/business), and governmental entities. The overall goal of this plan is to help ensure that the study reflects the values and needs of the communities it is designed to benefit. A schedule of events and a list of documentation exhibiting compliance with these procedures are included.

#### I. Description of Proposed Improvements

Financial Project ID: 442519-2-22-01 and 442519-3-22-01

ETDM Number: 14400

Project Limits: The study area for the I-75 (SR 93) PD&E Study extends from south of SR 951 (Collier Boulevard) in Collier County to SR 78 (Bayshore Road) in Lee County. The project is approximately 42 miles in length and traverses the major urban areas of Naples and Fort Myers in southwest Florida. It also crosses the navigable Caloosahatchee River in Lee County, just south of SR 78 (Bayshore Road), as shown in **Figure 1**.

Proposed Activity: The purpose of the Master Plan (Plan) is to identify long-term capacity needs along the I-75 mainline from east of SR 951 (Collier Boulevard) in Collier County to SR 78 (Bayshore Road) in Lee County, and develop interchange and managed lanes design concepts to address any segments identified as operating below the Level of Service (LOS) target adopted for this facility as part of the Strategic Intermodal System (SIS) designation.

The Plan shall provide recommendations based on alternatives analysis that bring the corridor into compliance with the Department Standards, enhance mobility, and improve safety. The Plan shall include a Priority List which identifies interim and long-term improvements. The recommendations and Priority List will support the development of the District Interstate Implementation Plan, which will be developed by the department.

Tentative Class of Action: Not applicable

## II. Project Background

I-75 (SR 93) from south of SR 951 (Collier Boulevard) in Collier County to SR 78 (Bayshore Road) in Lee County was presented to the public as a PD&E Study evaluating managed lanes. An in-person public kickoff meeting was scheduled for March 2020 but was reformatted to a virtual kickoff meeting in April 2020 due to Covid-19 requirements. The project began transitioning to a master planning study instead of a PD&E in November 2020. The Master Plan will identify a Priority List of improvements along the corridor to advance to the PD&E phase.

I-75 supports vital commerce and tourism of the state as it connects employment and population centers within the western regions of Florida. It functions as the only north-south limited access facility on the state's west coast. I-75 is a designated state hurricane evacuation route and part of Florida's Strategic Intermodal System (SIS) highway network.

The project is approximately 42 miles in length and traverses the major urban areas of Naples and Fort Myers in southwest Florida. It also crosses the navigable Caloosahatchee River in Lee County, just south of SR 78 (Bayshore Road). The functional classification of I-75 within the project limits is Urban Principal Arterial - Interstate. The project segment of I-75 consists of a six-lane divided typical section with a maximum posted speed limit of 70 miles per hour. Existing right-of-way along the corridor ranges from approximately 300 feet to 750 feet in width.

## III. Project Goals

The following goals and objectives have been defined for this study:

- Provide a comprehensive analysis identifying traffic operational deficiencies along the I-75 mainline and interchanges from SR 951 to SR 78, along with the prioritization of when improvements are needed.
- Engage with corridor stakeholders to obtain input on the corridor and proposed improvements.
- Develop an ultimate capacity improvement plan for the corridor to improve

reliability and flow of traffic along the corridor. The need for, type of, and cost of improvements shall be defined. This ultimate improvement may include adding express lanes while maintaining the existing number of general-purpose lanes and may include

- Adding additional general-purpose lanes or auxiliary lanes;
- Adding a collector distributor roadway system; and
- Traffic Systems Management & Operations strategies.
- Perform a preliminary assessment of environmental elements along the corridor to identify constraints.
- Compare design constraints, benefits, construction, and operation costs, right-of-way impacts and public support of typical section alternatives, and recommend a typical section for further evaluation during the PD&E Study phase or for Design and Construction.
- Identify bottlenecks and hot spots along the corridor.

#### IV. Identification of Elected/Appointed Officials and Agencies

Federal and State agencies, as well as Native American Tribes, having a concern in this project due to jurisdictional review or expressed interest have been identified and will be contacted directly by FDOT through their preferred form of communication (e.g. hard copy mailing or email) at project milestones. These contacts can be found on the following pages and can also be found in **Appendix A**. Subsequent contact list updates can be found in the Public Involvement Summary Report that will be compiled at project completion.

## V. Identification of Affected Communities and Stakeholders

This project is within Collier and Lee counties. A map of the project area is provided in **Figure 1** on page [2] of this document. Based on the demographics of the study area, over 15% of the residents mostly speak Spanish and are considered to have Limited English Proficiency (LEP). Therefore, the project team will translate all notification materials in Spanish and ensure that team members fluent in Spanish are present at the meetings. Over 25% of the population is age 65 or over. See **Appendix B** for the Sociocultural Data Report.

The following local, state, and national public interest groups or organizations having a direct or expressed interest in the project study have been identified and will be contacted by FDOT, District 1. **Appendix C** lists contact information for potential *stakeholders*.

Florida Engineering Society – Calusa Chapter  
Lee County Smart Growth Committee  
Bonita Springs Transportation/Economic Committees  
Collier Building Industry Association  
East Lee County Council  
Southwest Florida Chamber of Commerce  
Lehigh Acres Community Planning Panel

Florida Planning and Zoning Association

 Audubon Society of Southwest Florida  
 Conservancy of Southwest Florida  
 CREW Land & Water Trust  
 Defenders of Wildlife  
 Florida Panther Refuge  
 Florida Panther Society  
 Florida Sierra Club  
 Friends of the Everglades  
 Friends of the Florida Panther Refuge, Inc.  
 The Nature Conservancy

Additionally, all public and private groups, organizations, agencies and/or businesses that request placement on the project mailing list will be included.

**VI. Outreach Activities**

The following techniques will be used to notify the public of the proposed transportation improvement and to solicit public input into the project development process.

In addition to working with the media, different notification techniques will be used throughout the project development process. A brief description of these techniques is provided below.

**Letters/Newsletters:**

Invitational and informational letters and newsletters will be distributed to elected and appointed officials, property owners, business owners/operators, and interested parties as necessary. It is anticipated that *three* newsletters will be distributed for this study: *at the project kickoff, in advance of the alternatives public information meetings, and in advance of the public hearings.* To be inclusive in the public outreach for this project, notifications will be created in both English and Spanish. Notices may be hand delivered to residences and business located directly along the project corridor as deemed necessary by FDOT. Elected Officials will receive notification via email from the District Director of Transportation Development. Appointed officials will receive notification via email from the District Environmental Manager or designee.

**News/Press Releases:**

News/press releases will be submitted by the District’s Public Information Office (PIO) seven days prior to each public meeting and the public hearing.

**Public Notices/  
Legal Display Ads:**

Public advertisement will consist of a an advertisement published in the Florida Administrative Register and may also include publishing in area newspapers (*Naples News* and the *News-Press*) once prior to public meeting(s).

**Public Announcements:**

To distribute project information, flyers may be made available to organizations such as neighborhood and civic

groups, FDOT, and Collier and Lee counties, to publish in existing newsletters and websites. Any such correspondence will be coordinated through the District’s PIO.

**Direct Mail List  
For Notifications:**

The following will be contacted by direct mail to obtain input throughout the project development process and/or to provide project information:

- Those whose property lies, in whole or part, within at least 300 feet of the right-of-way of each project alternative (Section 339.155 FS), 300 feet from the centerline of cross streets, and 1,000 feet on either side of I-75 at interchanges, as well as other local citizens who may be impacted by the construction of this project. This portion of the mailing list will be based on the County Property Appraiser’s tax rolls. A map showing the parcels to receive these notifications can be found in **Appendix D**.
- Appointed public officials or individuals who request to be placed on the mailing list for this project. (Elected officials will receive notification via email from the District Director of Transportation Development.)
- Public and private groups, organizations, agencies, or businesses that request to be placed on the mailing list for this project.

**Techniques:**

**Presentations to Local Officials:** Presentations may be given to local officials and agencies such as the *Collier and Lee MPOs, and the Southwest Florida Regional Planning Council* prior to the public information meeting(s) and the public hearing to apprise local officials of the project status, specific location and design concepts, and receive their comments.

**Public Information Meetings:** Up to two Public Information Meetings will be conducted as determined by FDOT, to present the project, potential project alternatives being considered, and to obtain comments from the public. The public meetings will be informal and conducted in an open house format. Public meeting(s) must be advertised in the Florida Administrative Register and on the FDOT Public Meeting site at least seven days prior to the meeting.

**Informal Meetings:** In addition to scheduled public meetings, there may be additional unscheduled meetings with the public, elected and appointed officials, public agencies, or

civic groups. The purpose of these meetings will be to apprise the attendees of the project status, specific location and design concepts, and to receive input. The Department will be available with appropriate notice to attend meetings or make presentations.

**Community Events:** To maximize awareness of the project, study team members may appear and staff an information booth at community events. The booth may contain survey questionnaires, newsletters, or other project information. Staff will be available to discuss the study and public issues, concerns, and ideas. Event summaries will be prepared for each event. Potential community events are as follows:

**Lee County:** Southwest Florida & Lee County Fair (Lee Civic Center), Taste of the Town (Fort Myers Alliance of the Arts), ArtFest (Downtown Fort Myers), Fort Myers Boat Show (Downtown Fort Myers), Bonita Springs National Art Fest (Riverside Park, Bonita Springs)

**Collier County:** Collier County Fair, Naples Boat Show (Naples Municipal Airport), Naples Stone Crab Festival (Old Naples Waterfront)

**Website:** A program website has been developed by the IPM to provide current project information to elected officials, agencies, and the public. Links will be provided to allow the public to submit comment, sign up for the mailing list and to view or download project documents.

The direct link to this page will be:  
[www.swflinterstates.com/i75-connect-south-corridor](http://www.swflinterstates.com/i75-connect-south-corridor).

**Title VI and  
 Related Statutes:**

Information about the Title VI Program will be provided in the presentation, by handout, signage, and through availability of personnel, on the Title VI Program and the Relocation Assistance Program.

**ADA  
 Compliance:**

Notification of the Department’s intent to comply with the Americans with Disabilities Act (ADA) will be provided in the public advertisements for the public hearing, in invitational letters to property owners/tenants and local officials, in handouts, and by selection of a public hearing site that meets all ADA requirements.

**Public Outreach Activity Schedule:**

Figure 2 - Public Outreach Schedule

**VII. Coordination with Local Agencies**

Copies of aerial maps depicting all alignment and design concepts under consideration, along with draft copies of engineering and environmental study documentation, will be furnished to the County Engineers, with their review and written comments solicited.

The Consultant will notify the Department’s liaisons for Collier and Lee counties of project execution. The Department’s liaison will coordinate with the Project Manager to schedule meetings with the *counties* and their respective planning organizations.

**VIII. Public Involvement During Design**

To the extent public involvement activities are necessary in the Design phase, the Design Project Manager will be responsible for coordinating any such activities.

## Community Facilities

The community facilities information below is useful in a variety of ways for environmental evaluations. These community resources should be evaluated for potential sociocultural effects, such as accessibility and relocation potential. The facility types may indicate the types of population groups present in the project study area. Facility staff and leaders can be sources of community information such as who uses the facility and how it is used. Additionally, community facilities are potential public meeting venues.

## Block Groups

The following Census Block Groups were used to calculate demographics for this report.

## County Data Sources

Demographic data reported is from the U.S. Decennial Census (1990, 2000) and the American Community Survey (ACS) 5-year estimates from 2006-2010 and 2013-2017. The data was gathered at the county level. Depending on the dataset, the data represents 100% counts (Census Summary File 1) or sample-based information (Census Summary File 3 or ACS).

### About the Census Data:

Use caution when comparing the 100% count data (Decennial Census) to the sample-based data (ACS). In any given year, about one in 40 or 2.5% of U.S. households will receive the ACS questionnaire. Over any five-year period, about one in eight households will receive the questionnaire, as compared to about one in six that received the long form questionnaire for the Decennial Census 2000. (Source: <http://mcdc.missouri.edu/pub/data/acs/Readme.shtml>) The U.S. Census Bureau provides help with this process:

<https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data/2017.html>

Use caution when interpreting changes in Race and Ethnicity over time. Starting with the 2000 Decennial Census, respondents were given a new option of selecting one or more race categories. Also in 2000, the placement of the question about Hispanic origin changed, helping to increase responsiveness to the Hispanic-origin question. Because of these and other changes, the 1990 data on race and ethnicity are not directly comparable with data from later censuses. (Source: <http://www.census.gov/prod/2001pubs/c2kbr01-1.pdf>; <http://www.census.gov/pred/www/rpts/Race%20and%20Ethnicity%20FINAL%20report.pdf>)

The "Minority" calculations are derived from Census and ACS data using both the race and ethnicity responses. On this report, "Minority" refers to individuals who list a race other than White and/or list their ethnicity as Hispanic/Latino. In other words, people who are multi-racial, any single race other than White, or Hispanic/Latino of any race are considered minorities.

Disability data is not included in the 2010 Decennial Census, or the 2006-2010 ACS. This data is available in the 2013-2017 ACS.

Because of changes made to the Census and ACS questions between 1990 and 2017, disability variables should not be compared from year to year. For example: 1) With the 1990 data the disabilities are listed as a "work disability" while this distinction is not made with 2000 or 2017 ACS data; 2) The 2017 ACS data includes the institutionalized population (e.g. persons in prisons and group homes), while this population is not included in 1990 or 2000; 3) the age groupings changed over the years.

Please take the following two concerns into account when viewing this data: 1) With the 1990 data the disabilities are listed as a "work disability" while this distinction is not made with 2000 or 2017 ACS data; 2) The 2017 ACS data includes the institutionalized population (e.g. persons in prisons and group homes), while this population is not included in 1990 or 2000.

## Community Facilities

The community facilities information below is useful in a variety of ways for environmental evaluations. These community resources should be evaluated for potential sociocultural effects, such as accessibility and relocation potential. The facility types may indicate the types of population groups present in the project study area. Facility staff and leaders can be sources of community information such as who uses the facility and how it is used. Additionally, community facilities are potential public meeting venues.

## Block Groups

The following Census Block Groups were used to calculate demographics for this report.

## County Data Sources

Demographic data reported is from the U.S. Decennial Census (1990, 2000) and the American Community Survey (ACS) 5-year estimates from 2006-2010 and 2013-2017. The data was gathered at the county level. Depending on the dataset, the data represents 100% counts (Census Summary File 1) or sample-based information (Census Summary File 3 or ACS).

### About the Census Data:

Use caution when comparing the 100% count data (Decennial Census) to the sample-based data (ACS). In any given year, about one in 40 or 2.5% of U.S. households will receive the ACS questionnaire. Over any five-year period, about one in eight households will receive the questionnaire, as compared to about one in six that received the long form questionnaire for the Decennial Census 2000. (Source: <http://mcdc.missouri.edu/pub/data/acs/Readme.shtml>) The U.S. Census Bureau provides help with this process:

<https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data/2017.html>

Use caution when interpreting changes in Race and Ethnicity over time. Starting with the 2000 Decennial Census, respondents were given a new option of selecting one or more race categories. Also in 2000, the placement of the question about Hispanic origin changed, helping to increase responsiveness to the Hispanic-origin question. Because of these and other changes, the 1990 data on race and ethnicity are not directly comparable with data from later censuses. (Source: <http://www.census.gov/prod/2001pubs/c2kbr01-1.pdf>; <http://www.census.gov/pred/www/rpts/Race%20and%20Ethnicity%20FINAL%20report.pdf>)

The "Minority" calculations are derived from Census and ACS data using both the race and ethnicity responses. On this report, "Minority" refers to individuals who list a race other than White and/or list their ethnicity as Hispanic/Latino. In other words, people who are multi-racial, any single race other than White, or Hispanic/Latino of any race are considered minorities.

Disability data is not included in the 2010 Decennial Census, or the 2006-2010 ACS. This data is available in the 2013-2017 ACS.

Because of changes made to the Census and ACS questions between 1990 and 2017, disability variables should not be compared from year to year. For example: 1) With the 1990 data the disabilities are listed as a "work disability" while this distinction is not made with 2000 or 2017 ACS data; 2) The 2017 ACS data includes the institutionalized population (e.g. persons in prisons and group homes), while this population is not included in 1990 or 2000; 3) the age groupings changed over the years.

Please take the following two concerns into account when viewing this data: 1) With the 1990 data the disabilities are listed as a "work disability" while this distinction is not made with 2000 or 2017 ACS data; 2) The 2017 ACS data includes the institutionalized population (e.g. persons in prisons and group homes), while this population is not included in 1990 or 2000.
